

Before the treatment

03.03.2008 13:03 Markéta Váňová

Good morning, I have an 11 year old son. He has had psoriasis in his head since he was 5. At the beginning of the year he started to have spots on his trunk, thighs and hands. Knees and elbows are clean at the moment. We have tried cannabis ointment, corticoids and we go to the salt caves on regular basis as well. Nothing helps. Could you please send me a sample of Dr. Michaels? My son is very unhappy he can't even go to play with other children.

10.03.2008 Prim. Stepánka Čapková

Dear colleague, I will be happy to take care of your son, we should receive sets for children during the week of March 17. Mrs. Vanova's son could come to see me March 21 after 12 pm., but first he should register at the ground floor. I have my office at the Children Dermatology, 3rd floor, at the Children Policlinic. Regards, Prim. Čapková

After the treatment

27.03.2008 13:03 Markéta Váňová

Dear Mrs.Gruberová, thank you for providing treatment to my son. We received Dr. Michaels products from Prim. Capkova from the Motol hospital. I think you deserve to know that after 4 days psoriasis at the head is almost gone. Except for a few pink spots, after 7 years his head finally looks normal and healthy. The big spots on his body are healing and the tiny spots are not getting bigger. Imagine an 11 year old boy standing in front of a mirror crying from happiness. I got the greatest present for my tomorrow's birthday. Thank you all. All the best, Markéta Vánová

21.05.2008 17:19 Markéta Váňová

Thank you, my son is without any symptoms at the moment. We stopped using the products 5-6 weeks ago, and so far so good. It is a miracle and I hope it stays this way. I placed your leaflet at the paediatrist where my children go, so that the other children will have equal chance with psoriasis as we got. I recommend your products everywhere and thank you once again. Your faithful patients, Váňovi from Ústí n. Labem.

06.03.2008 23:21 Milan Popelka

Good morning, I would like to share my experience with Dr. Michaels products. I am 21 years old, and I got psoriasis when I was about 14. So from this point of view I am quite experienced patient.

First it started in my head, later I was getting smaller or bigger spots all over my body. I went to consult with my doctor, of course, therefore my experience with different corticoid and mixed ointment is quite broad. Most of you know how it goes – strong corticoid, then for about 2-3 weeks that overwhelming feeling of victory and then it all starts again, but the healing effect is not so strong any more. And not to even think about how this chemistry was destroying my body.

Since then, I have tried various products from cannabis, which worked undoubtedly longer, however, psoriasis came back anyway. And now regarding Dr. Michaels...I have to say that I had known about these products for quite a long time, but I kept telling myself that first I would try this and that and if it would not work, then I would try Dr. Michaels (the reason for this hesitation was mainly the price of a set).

Finally I bought the first set in December last year. I have to admit that due to large areas of psoriasis on my body the whole procedure took me about 45min. in the morning and in the evening, so it was quite time consuming and sometimes I skipped one which made the healing longer.

However, after three months of treatment I can say.....absolutely AMAZING product!!!! 95% of the spots are gone, and every day I can enjoy the feeling that when I take my t-shirt off there is NOTHING!

And the best thing is – it is all pure nature! No chemicals, no more damage of my body!

Today, when I remember how much money I had invested into all the other products before I bought Dr. Michaels, all those sets and the clean feeling I could have had a long time ago... I would like to sincerely thank the people who got this set into our pharmacies!

Today I know that I have got a good weapon against psoriasis, and even if I get a small spot from time to time, I laugh at it, because I know that it I will easily get rid of it within a week! At the end...I am aware that there are many forms of psoriasis and not everything is applicable to all types, but it's worth a try!

PS: It was quite easy to get rid of the papules on my trunk and arms, but the bigger spots on my shins kept being resistant even after two months of treatment. I almost wanted to give up and reconcile to the fact that it will stay on my legs. Finally I bought one more ointment and all the sudden after two weeks the papules started to vanish rapidly. This only proves that with this treatment the results will not come in a week, but if you are persistent, you are almost sure to win. The last but not least – conquer it!

2.03.2008 00:00 Hana Slámová

Good morning, I am extremely happy that I have found out about you on the internet. I studied everything carefully and purchased one set. I have had psoriasis since I was sixteen. It was in a hidden form on my elbows, but after the birth of my youngest it became much worse. I have also been fighting the spots on my shank for nine years. I am forty now. Recently the psoriasis started to appear all over my body in small spots which started to unobtrusively get bigger.

I felt disgusting and was afraid that my husband would touch me on one of the scurfy and itching spot.

I did not feel good emotionally either. Those of you who have the same problem for sure know what I am taking about. That is why I started to try different alternative ways until I found Dr. Michaels products.

I have been using them for about six weeks and the result is amazing. The spots are not itching, they are not scurfy, the skin is becoming smoother and lighter every day. The small spots of psoriasis disappeared completely and the spots I have had for years are getting lighter. I am happy, thank you so much. All of you with the same problem – just be patient, follow the given instructions. It works. Thank you again, Hana Slámová

19.02.2008 14:41 Blanka Papirnikova

Good morning, I minute ago I wrote a message if I can use your products even during pregnancy but going through your forum I have just found a story in which you write that it is possible to use them during pregnancy, I thought so. I have to say that I have had psoriasis for 24 years and I have tried about everything , with bigger or smaller success, psoriasis keeps coming back, but I have to say that healthy lifestyle and optimism in combination with Dr. M. Tirant products are so far the best , this is the first time ever I am almost without psoriasis and not to even mention the use of your product, which is much more simple than with other treatment that I have had to go through, you can do everything at home, it is not difficult or time consuming, but it is important to do it on regular basis and to be patient, but I do not have to emphasize that. The truth is that the price is quite high, but it is definitely worth it. If I was to compare this with commuting to daily sanatorium and the time spent there then I would say it is almost equal. Different things work for different people, but I am extremely happy with these products, I have been using them for two months, now I am about to discontinue the treatment so I am interested to see what happens with psoriasis. We will see, I will keep you posted. Have a good day, B. Papirnikova

15.11.2007 11:40 Marie Prstková (3x)

Good morning, everyone who looks at this forum every now and then sees that I am a regular contributor about my treatment with Dr. Michaels products. During this spring I went through 9 weeks of intense treatment with all three products, I want to emphasize that I used them truly 2x a day. It was like a miracle for me, because the psoriasis that I had had for 25 years almost all over my body disappeared completely. At the beginning I was carefully watching myself it was not coming back, but as the time went I was sure it was not. I felt like a normal person after a long time. People suffering from psoriasis know what I am talking about. A month ago I had a shoulder surgery and afterwards I noticed only small pink spots (about the size of a pea), about five of them on each leg.

Since I had no ointment at home, I had used it all, I left it alone waiting what would happen. It did not become bigger and I just use regular body lotion, but I will buy your products again, since I strongly believe that everything will get healed again. I had more than 50% of my body affected by psoriasis so I will not get upset about the few spots when I know how to get rid of them. I recommend everybody to use the three products of Dr. Michaels, they help my friends as well. Always this time a year I had all of my body covered with psoriasis, literally, but now I have this great feeling of freedom, piece . As all the patients of professor Novotný always say, it comes back (if at all) only in small amounts or after some change, like a sickness. This year I am finally calm and happy, I KNOW HOW TO FIGHT PSORIASIS!!!

17.09.2007 09:14 Otakar Divis

After applying the three products by Dr. Michaels, after three weeks there was 100% improvement, there are no signs of psoriasis any more. Plus I had a vacation by the sea, and upon return there is no psoriasis. The sea + the sun had positive influence. I recommend this.

06.2007 20:17 Lenka Mandíková

I have been using Dr. Michaels ointment for two years already. So far I am absolutely happy, but I would like to know if there have been any long term tests done \"the loss of effect if used long term\". I am myself very surprised that it still \" works \" like at the beginning. That is why I would also like to know if there is any product for \"change\" of the treatment? The idea that after certain amount of time I would again have to look for a product that works truly terrifies me :-(

16.05.2007 12:07 Mgr.Hana Pávková

Good morning, I never really publically react towards different issues, but I want to make an exception in this case. The reason is very simple: I wish that all the people with psoriasis could experience that tremendous feeling when you can put on any dress you want and not the kind of dress which would hide the affected parts of your body in front of other people's eyesight. I am allergic to all those commercials „lose weight after 1 tablet“, etc. But in case of Dr. Michaels the miracle really happened. I have been struggling with psoriasis for many years with smaller or bigger success. I was following the information about Dr. Michaels products in magazines and on the internet. As soon as I had a chance to try them, I did not hesitate for one moment - there is no room for discussion when it comes to money or health. After one week it was obvious there were positive changes, after two months I was without any symptoms (and feeling great). I am just a bit worried about my immune system, if after a while it would not find its way how to make my problem visible again. I would like to know if it is necessary to keep using the ointment all the time or to discontinue using it after the symptoms are gone, due to autoimmune character of this disease. Thank you. H.Pávková

09.05.2007 13:24 Marie Prstková (2x)

Greetings to everybody after a one-month test of Dr. Michaels product. I started April 11, with my head all covered with flakes of skin, every day for the night I had to use the ointment and use the occlusion so that the following day I could be among people, my legs from knees down were all swollen, crackled and bloody all the way down to my ankles, on my back along my backbone and shoulders I had big red spots, I had it in my ears, in my groins, under my breasts, around my belly button, arms, elbows, thighs, I had psoriasis simply everywhere I looked, I do not have to explain how felt, who also has it knows. Today, after one month of using the ointment – the head is clean as it has not been for 25 years, my body, except a few pink spots around my coccyx is clean, on my elbows I only have pink spots, my arms, under my breasts, my belly button, ears, cheeks, that all is healed!!! It is unbelievable, but it is true. I took a picture of my legs with my mobile so that I could see the difference and show it, today I took another picture, my legs are in even better shape, light pink, on some places it is completely gone, where it begins with red spots and then connects together it starts to disappear and I am left with only small red spots. Legs were the worst, crackled and bloody, I could not walk, it hurt that much. Now I apply ointment 2x a day, really, it costs a lot but I believe that after eight weeks the legs will be clean as well.

In any case I have not felt so free and relieved all those 25 years I have had psoriasis, I am so enthusiastic about life, I plan to wear short skirts during the summer, it is so amazing when you can take your clothes off and not feel ashamed, I am not afraid to look in the mirror any more. If anybody does not believe me, Dr. Fialová can proof at what stage she started to take care of me last year, even the radiation did not help my legs, not even the baths. I am so thankful for the help that Dr. Michaels products have provided me. When I remember all the things I had to give up during these 25 years due to psoriasis, it is terrible. I would like to thank very much to Ms. Judita Kovacz, who started the import of these products and therefore helped all the patients. Your thankful patient, Marie Prstková

05.2007 07:51 Ruzena Novotná

It is really great. I am pleasantly surprised, after using the products only 3x I could already see the results. Roza

04.2007 14:20 Marie Prstková (1x)

Good morning, I have a serious form of psoriasis, and I am really against using corticoids again. I have tried about any possible treatment during all those years, and as all the patients I have been very depressed. I have just found your website and already today I am trying to find Dr. Michaels products, I will let you know how the treatment goes.

04.2007 09:04 Edita

Good morning, thank you for your response. I was glad to hear that it is possible to use Dr. Michaels products even during pregnancy. Since the day of your response I have been applying the products and after 14 days all the external symptoms are disappearing from my arms and legs. I finally feel being myself! I will definitely recommend your products to every patient I know. Thank you very much once again!!!

03.2007 19:47 Sarka

Good morning, thank you for your response. I bought your set and I have been using it for three days regularly, as recommended. Even just after the three days I am noticing big improvement. Finally there is something that works, I am very satisfied with your set and I will stick to the recommended time of use. Thank you very much again!

25.03.2007 18:23 Olga Kohoutová

Hello, I am without psoriasis for two years already. It is in its hidden form, though, but the external symptoms are minor. I have had this disease for 20 years. I have been hospitalized a few times, once even in Prague with prof. Novotný in 1988. Last year during the winter I started to use Dr. Michaels products and after two months was completely without any external symptoms. For the first time I could wear a dress on my daughter's prom. I can wear short sleeves. I feel very good. My GP doctor is pleasantly surprised and is also very happy for me. I suggest all the patients to invest into these cosmetic products, it is worth it. You lose much more money being on a sick leave! Olga Kohoutová, C.Budejovice

08.05.2006 22:19 Honzik

Good afternoon, I just wanted to thank all the people that have been participating on the development, distribution and consulting regarding these products. I purchased them, tried them and I was like Alice in Wonderland! I had about 5-10% of my body affected with psoriasis, depending whether it just felt like making my life miserable or not. Now I only have a few red spots, no flakes, and my skin is cleaner than the skin of any of my colleagues at the student dorm – and they are not psoriasis patients! I have looked for and also have tried various things, I have only had psoriasis for a year, but I have been through terrible things. Now I can take off my t-shirt during the summer if I want. And I do not even use the products 2 times a day and sometimes I even skip one application. But at the beginning I would for sure recommend to follow the instructions carefully. I have gotten used to it and so now it is simply part of my daily routine, so in order to feel better I simply have to use these products. Just the high price! Unfortunately I have to use the products all over my body. I have two dermatologists, and they both consider this to be a miracle – I have not visited them for 3 months. I hope it will stay this way and that these products will help all of you as well. I cross my fingers for you since I know that this psoriasis is really a f..... disease. Take care!
